

Erika is a homeschooling, homesteading mom who is also a devoted registered nurse. She loves connecting with each patient and supporting each unique journey. She has been working as a nurse since 2021 and has cared for both adult med-surg floor patients as well the NICU, where she handled the cutest and tiniest patients. She is enthusiastic about working with IV infusions and always keeps up to date with the latest IV courses/practices and treatments. She is inspired when a patient receives an IV infusion and appreciates how it can help heal or boost the human body. The time Erika has with patients gives her the privilege to connect with people and hopefully create a relaxing hour that lets the body rest (naps are a-okay during treatment too!). She loves her walk-through life with God and she feels blessed with an incredible husband, daughter, and family. She is inspired by anything outdoors, chickens, goats, bee keeping, and you can find her spending most days adventuring or dancing barefoot in the kitchen with her family.
